Build exactly what you want.

Bring your ideas to life without compromising your vision. LiveSwitch's powerful APIs were designed with flexibility in mind so you are never limited by your video platform.

Cost-optimized connections

Only pay for the connection quality you need. LiveSwitch intelligently changes connection types within conferences so you can be confident that your conferences are always optimized for quality and cost.

Streamlined server management

DevOps just got easier. With LiveSwitch's powerful configuration console, developers and DevOps teams can easily manage your servers, applications, and channels with just a click of a button.

Video without limits

Connect anyone, anywhere to rich and reliable video experiences. From small-scale conferences to massive live broadcasts, LiveSwitch can handle it all.

Deployable anywhere

LiveSwitch is deployable on any infrastructure of your choice, and with our Regionality feature, you can leverage geo-located clusters interconnected with high speed backbones. Reduce latency and improve your users' experience - we take care of the tough stuff.
