Introducing LiveSwitch

Audio/Video Conferencing • Recording • Broadcasting • Text Chat • VoIP/SIP Integration

LiveSwitch P2P, SFU and MCU

LiveSwitch gives you the flexibility to combine P2P, SFU, and MCU-based media flows in a single channel, as well as mix and switch dynamically as desired while the channel is live.

LiveSwitch Gateway

HTTPS/WebSocket Based

Gateway handles:

- Signaling
- Client registration
- Text Chat & Messaging

Redundant Failsafe:

- Place multiple gateways behind a load balancer
- Seamless fallback

LiveSwitch Architecture

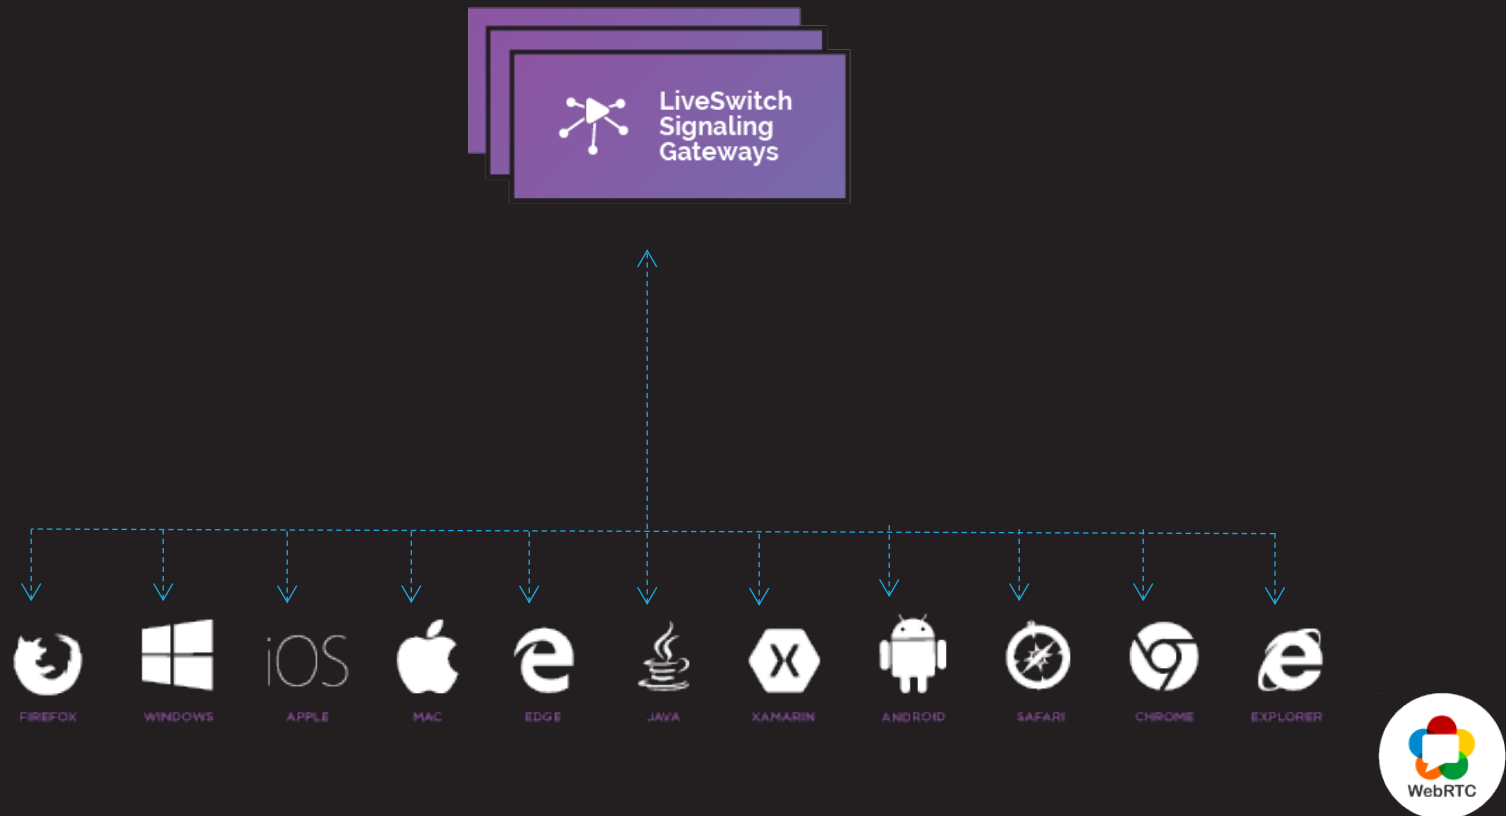

LiveSwitch Clients

Client SDKs for Most Platforms

- Native iOS & Android
- All major browsers
- Xamarin
- .NET, UWP

LiveSwitch Architecture

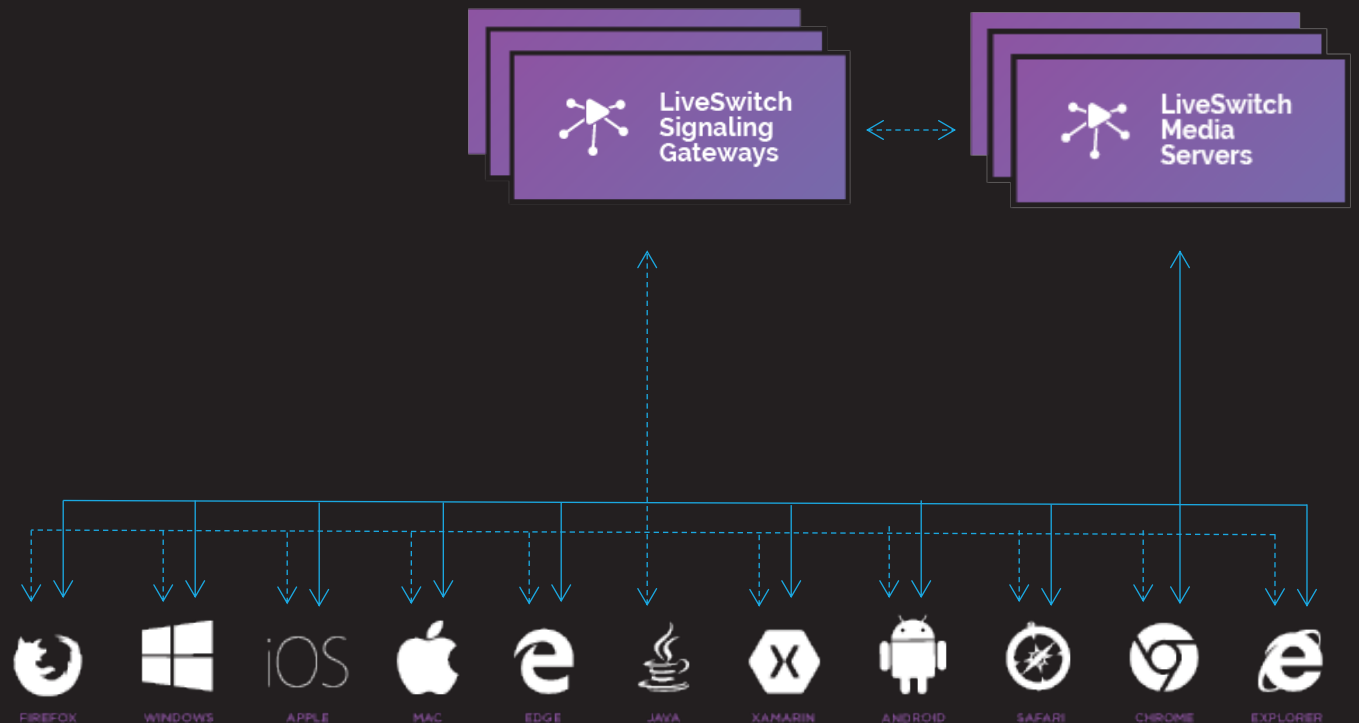

LiveSwitch Media Server

Hybrid Capabilities:

- Peer-to-Peer
- Selective Forwarding (SFU)
- Multipoint Control (MCU)
- Transcoding
- Multiple Codec Support
- Highly Available
- Geodistributable

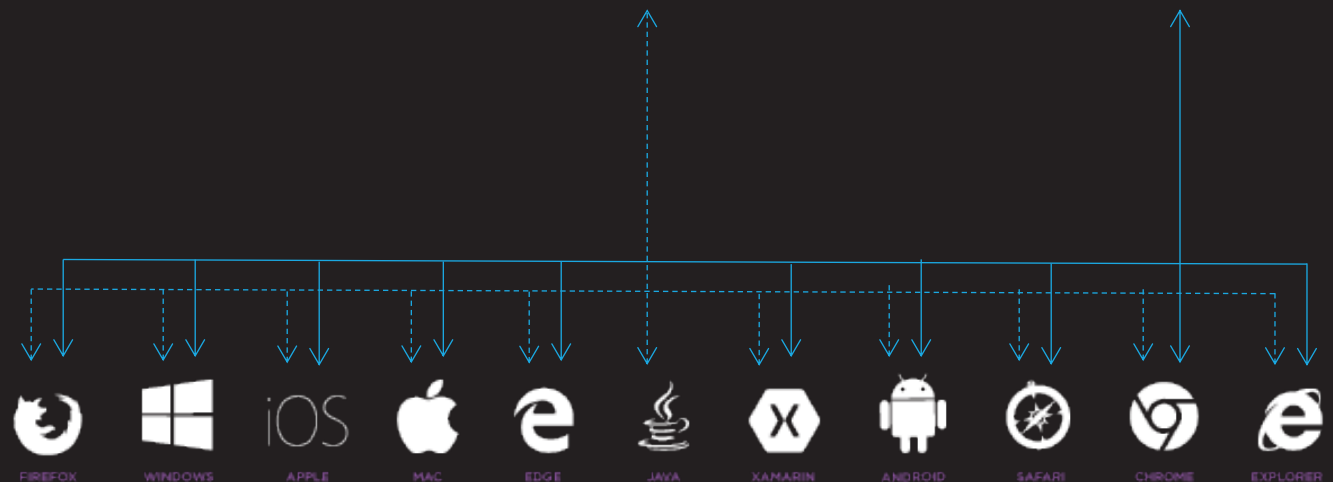

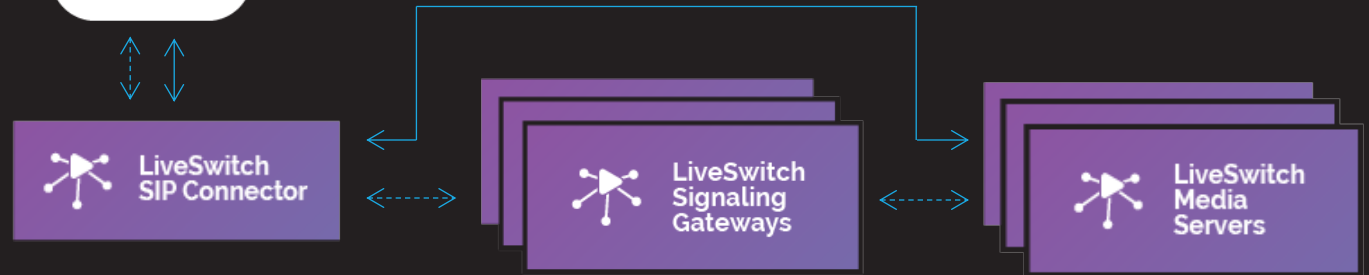

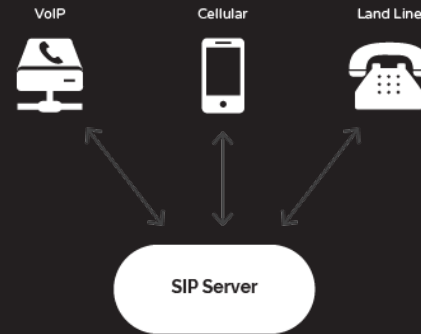

LiveSwitch Architecture

LiveSwitch SIP Connector

Easily Connect To Your
Preferred SIP Server/Trunk

LiveSwitch Architecture

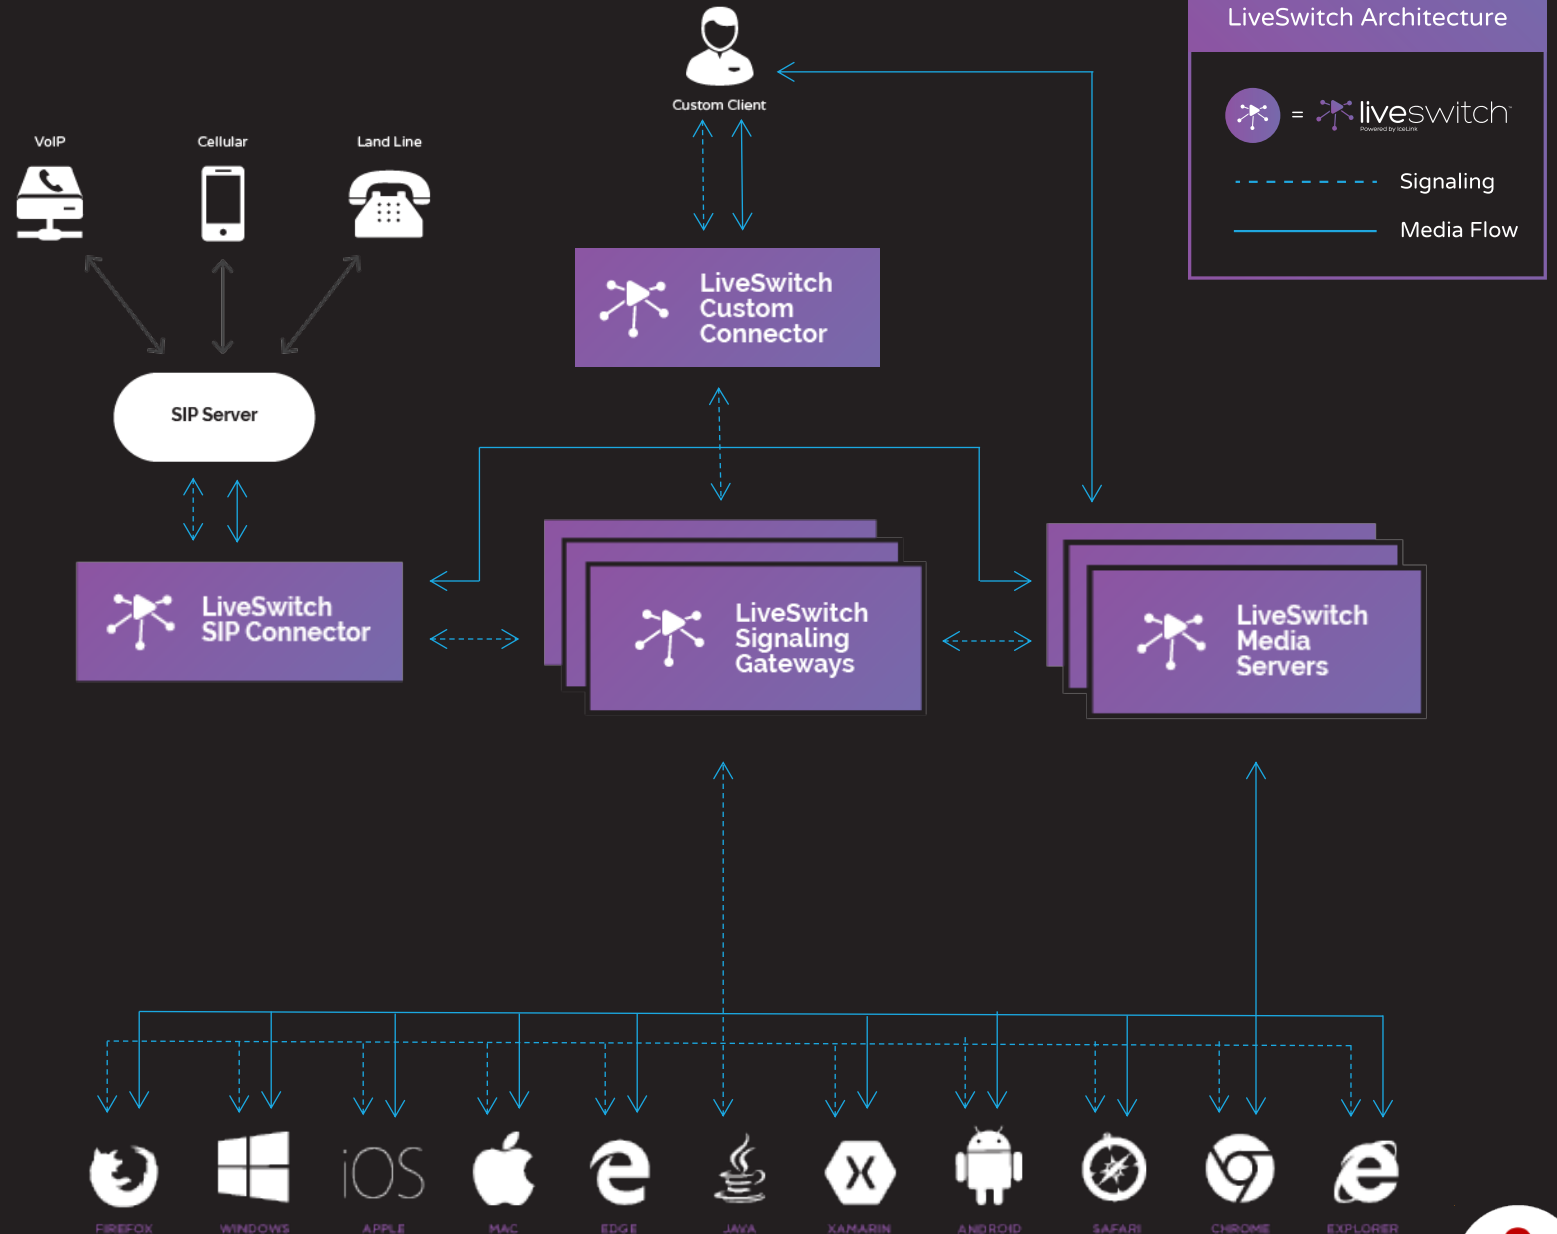

----- Signaling
———— Media Flow

LiveSwitch Custom Connector

API for Custom Integrations

- mHealth Peripherals
- Special Streaming Protocols
- Proprietary Hardware
- IoT Devices

LiveSwitch Applications

Audio/Video Conferencing • Recording • Broadcasting • Text Chat • VoIP/SIP Integration

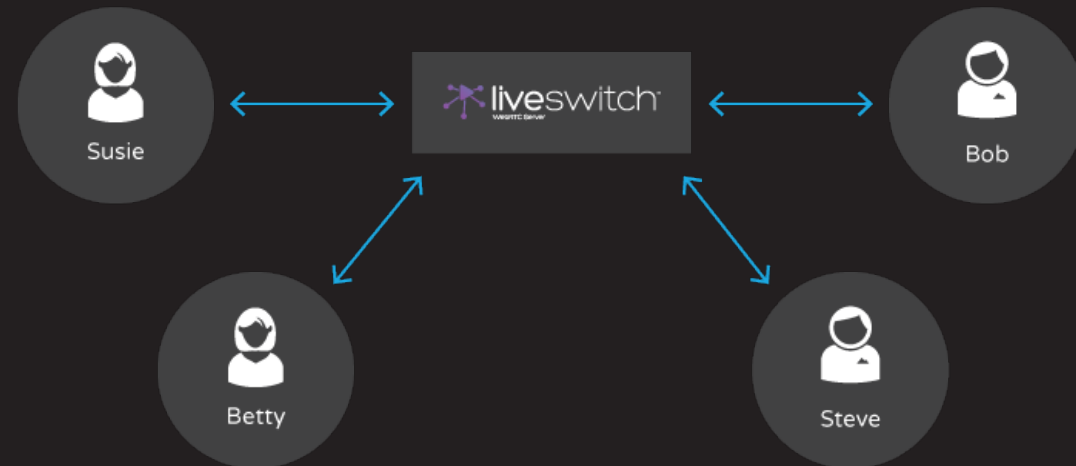

LiveSwitch for Calling

- Simple 2-way WebRTC-based Audio/Video calls
- Text Chat Within the Call
- Full support for Screen Sharing & datachannels for Whiteboarding
- SIP Interoperability
- Full Apple CallKit Support

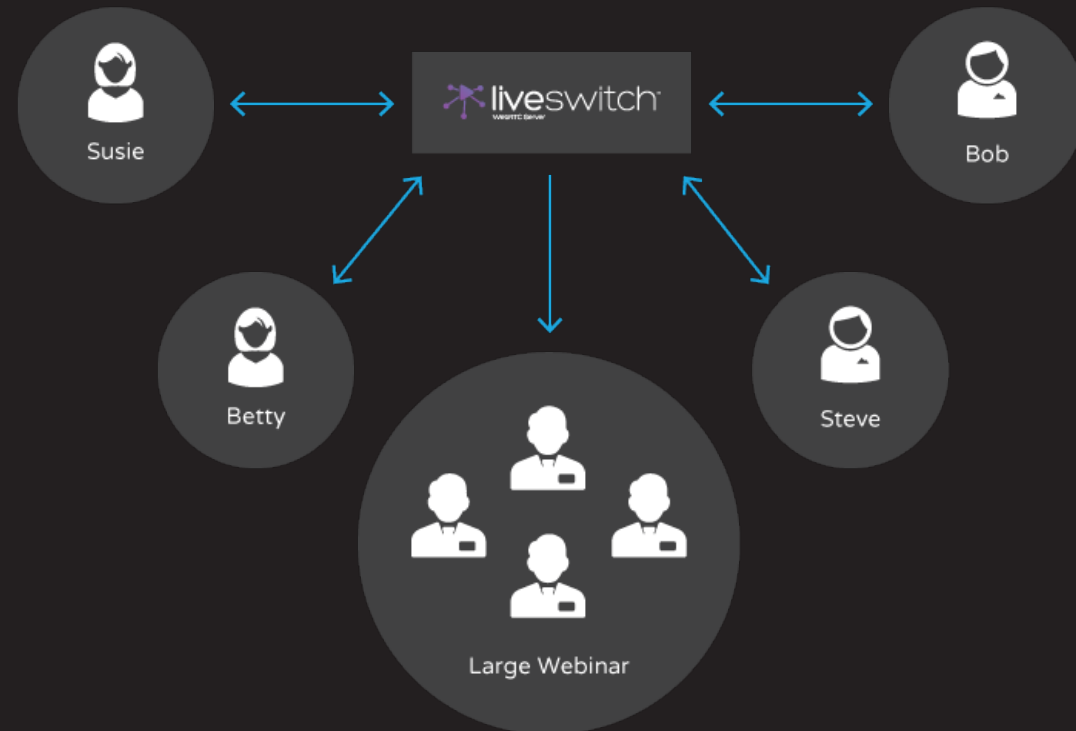

LiveSwitch for Conferencing

- Easily Add More Participant Audio and Video Sources
- For Telemedicine, Teleconferencing & Remote Consultation

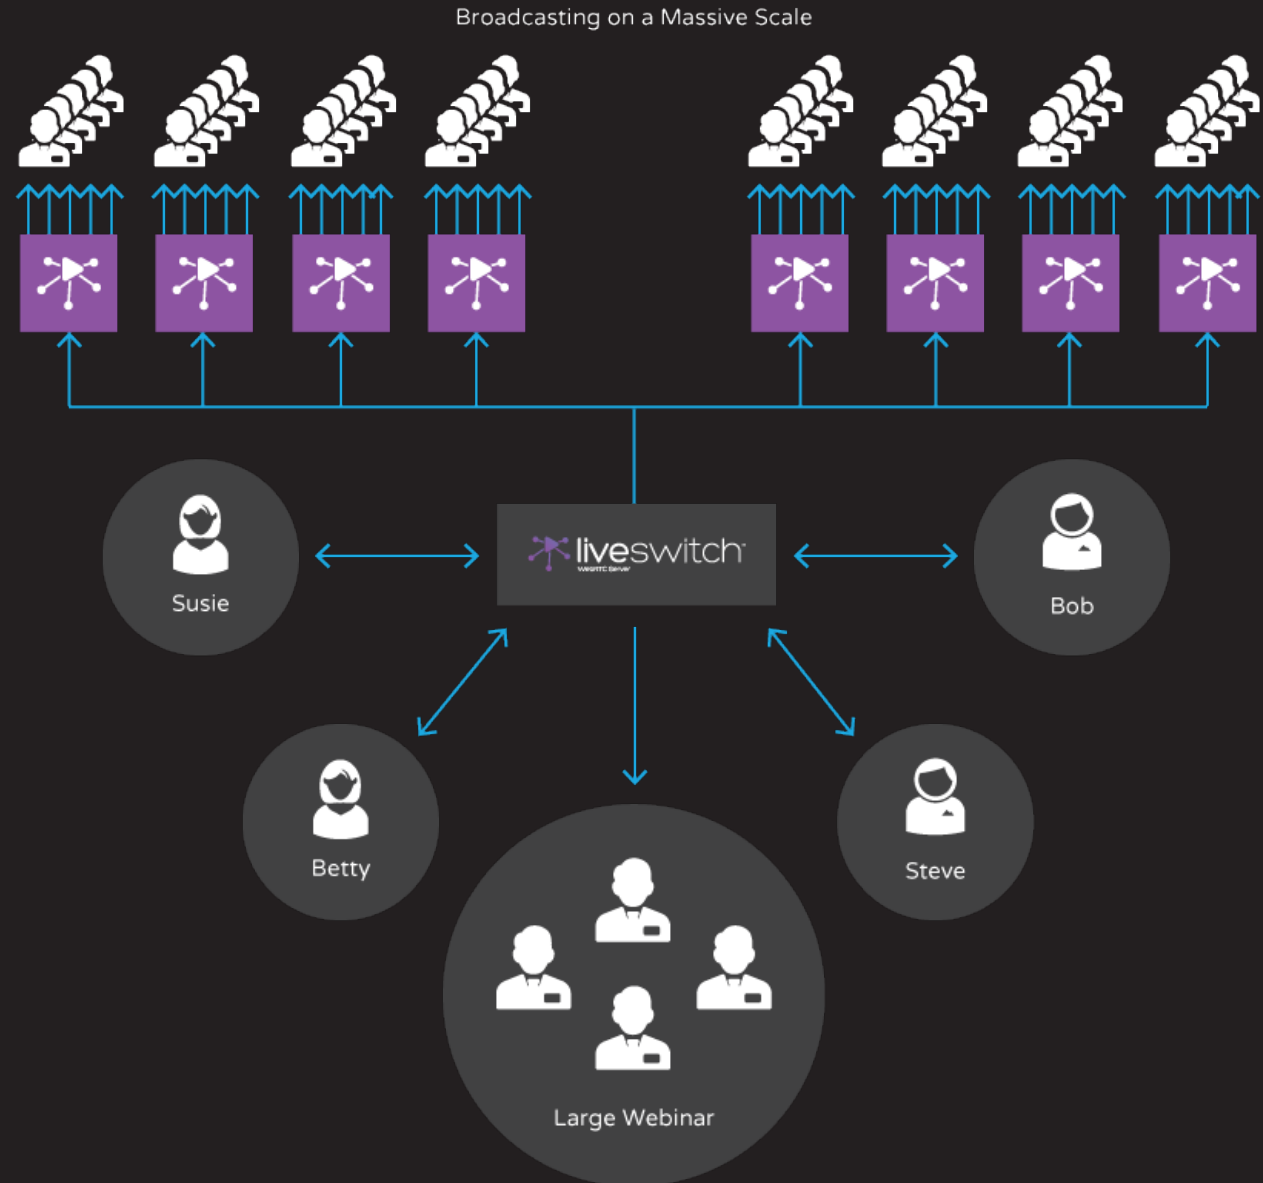

LiveSwitch for Webinars

- Stream with Multiple Codecs Simultaneously
- Send Multiple Streams Optimized for Audience Bandwidth
- For Virtual Classrooms

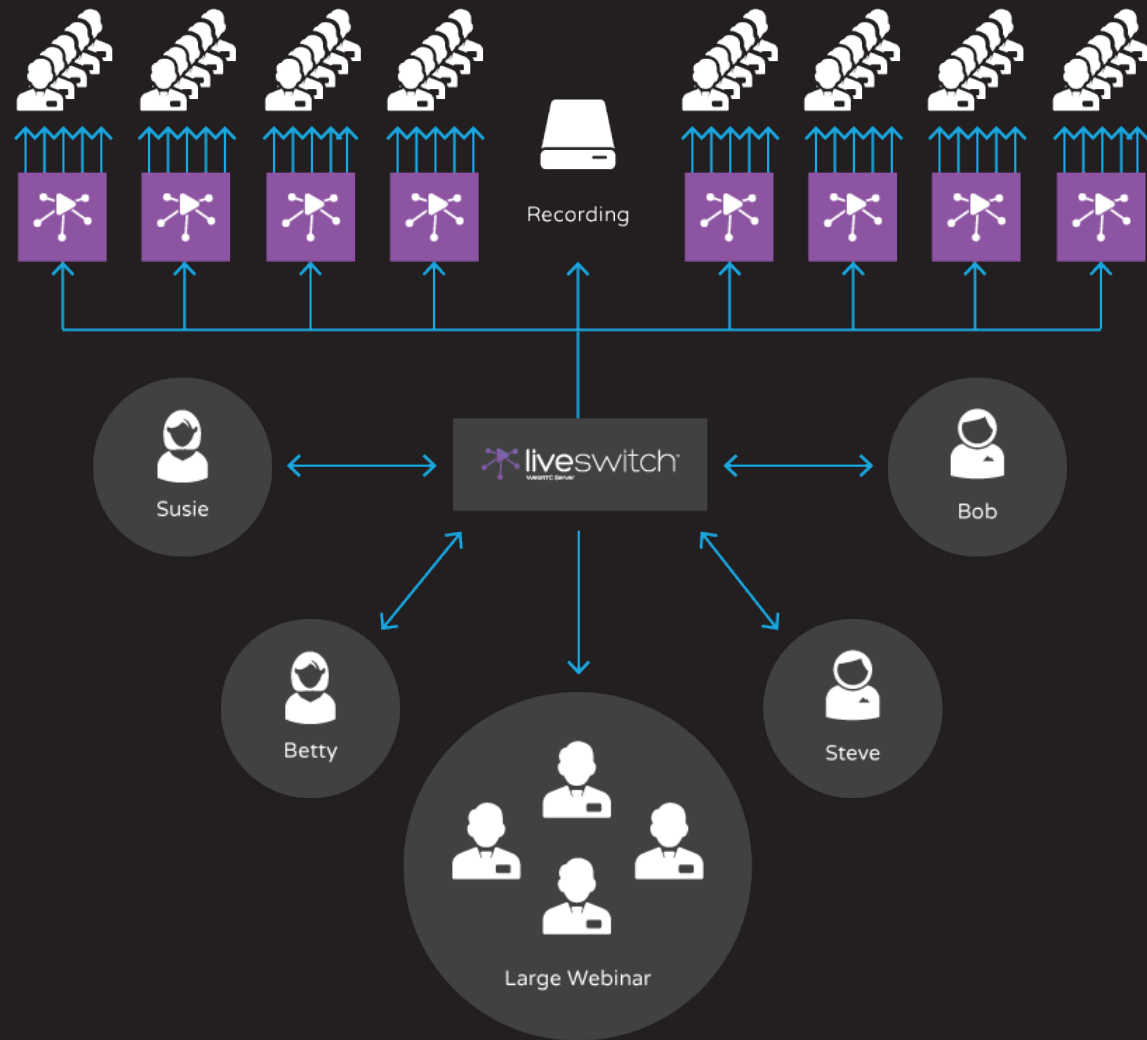

LiveSwitch for Broadcasting

- Horizontally Scalable
- Vertically Scalable
- Low Latency
- From Hundreds to Millions of Clients

LiveSwitch for Recording

- Capture Any Source
- Mixed or Unmixed
- Designed for Flexibility

Audio/Video Conferencing • Recording • Broadcasting • Text Chat • VoIP/SIP Integration

frozenmountain.com

LiveSwitch Covers iRTC

- Audio/Video/Data Streaming
- Signaling
- Text Chat & Messaging
- Pub/Sub
- P2P, SFU, and MCU Hybrid Media
- VoIP/PSTN Legacy and SIP Support
- Broadcasting and Recording
- Screen sharing and Whiteboarding
- Customizable and Extensible
- Highly Scalable

Professional Services

iRTC Assessments

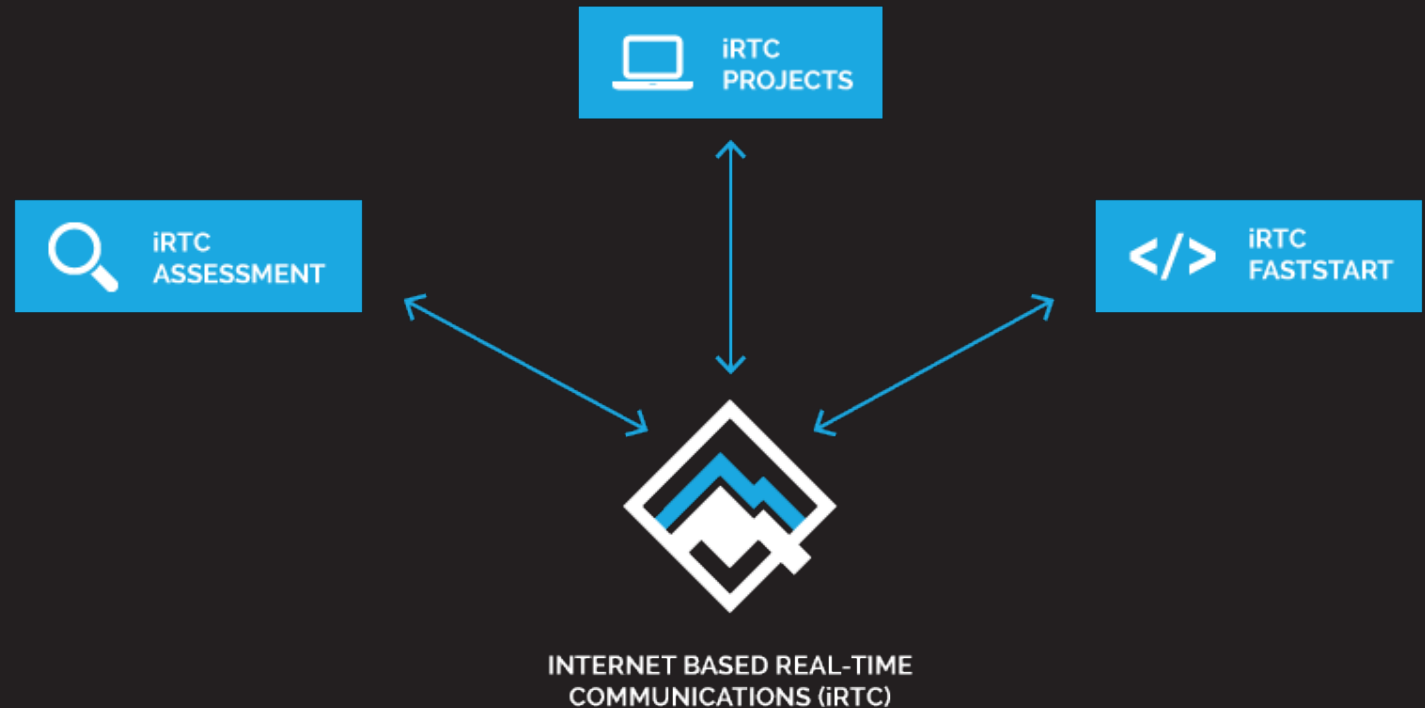

- Architecture assessment and a complete project plan and budget

iRTC FastStart

- Receive a Senior Developer for five days to start your iRTC project

iRTC Projects

- Custom application design and development

Frozen Mountain Partner Program

- For application development companies & WebRTC advocates
- Receive a commission and share of revenue from all referred product sales
- Get referral credit for leads originating from your registered website domain
