

More than ever, educators, administrators and regulators are looking for scalable virtual classroom and testing center solutions that can handle unlimited parallel sessions, accommodate flexible group sizes, and be accessed on practically any device.

Now with Frozen Mountain's *LiveSwitch™*, e-learning providers can tap into previously unleveraged distance education experiences using AI-ready live video streaming and conferencing to engage students anywhere in the world, simplify e-collaboration activities, and ensure integrity while administering online exams.

The *LiveSwitch™* live video platform and AI-ready API can integrate classrooms and testing centers with a wide range of scalable features, providing educators, administrators, and regulators with unprecedented access to e-classroom data and experiences like never before.

#### For Program and Testing Administrators

Program and Testing Administrators are now able to more effectively validate changes and report on student engagement levels and student/proctor integrity on a per-session basis.

#### For Educators

Educators can now identify and measure in concrete terms which course content resonates most with students and leverage it to positively influence test scores, graduation rates, and learning.

#### For Compliance Regulators

Organizations can now provide Compliance Regulators with stronger proof they are detecting and preventing fraudulent student activity during course delivery and exams.

## Build better virtual classrooms and test center applications with AI-Ready live voice and video.

### Stretch the limits with live video.

With *LiveSwitch™*, take advantage of our flexible live video and voice APIs to shorten your virtual classroom application development timeline and add incredible AI-driven capabilities.

Seamlessly monitor and scale your application with built-in dashboards and telemetry, and unlock dynamic capabilities to tailor your streaming experience across thousands of concurrent users and sessions.

At any stage of your virtual classroom or testing platform's growth, seamlessly integrate with a wide range of AI-based real-time analysis packages, providing educators, administrators, and regulators with unprecedented access to e-classroom data like never before.

### Seriously cross-platform.

Enable learners and proctors to connect to a virtual classroom or test center from any device, browser, or hardware using our massive set of client libraries.

### Built to scale.

Develop dynamic applications. Monitor and manage every session channel all in one place. Personalize learner and proctor interactions at a massive scale.

### Flexible integrations.

Integrate AI services and unlock AI-driven video analysis capable of verifying learner identities, eliminating dishonesty, and measuring course content effectiveness.

## Make the Switch.

Are you currently using another live video platform and want to eliminate your recurring monthly costs? Make the switch to *LiveSwitch™* - our enterprise-grade, massively scalable live video platform, designed to easily scale with your application.
