

Virtual events providers are now delivering enhanced attendee experiences with interactive live stages and meeting rooms.

With Frozen Mountain's *Private LiveSwitch Cloud*, event management companies can produce virtual conferences with one-of-a-kind user interfaces and unique interactive features. Engage your attendees with low-latency live video and get them coming back for more.

- ✓ Ultra low-latency private cloud live video infrastructure
- ✓ Small breakout rooms up to large keynote sessions with thousands of viewers
- ✓ Developer-friendly API and SDKs to create your ideal audience experience

Virtual Conferences & Tradeshows

Add the exact conferencing features your event platform needs. Integrate hand-raising, chat, live captioning, virtual microphones, break-out rooms and more with our flexible live video API.

Unified Event Ecosystems

Keep all your audience's activities on your own unified event platform. Add virtual live video-based rooms and stages. Integrate with your own registration, scheduling, and payment systems.

Live Interactive Main Stages

Leveraging our sub-second latency, presenters can hand off virtual microphones to remote audience members. Recreate the interactions normally found at in-person events and bring the audience energy online.

Private LiveSwitch Cloud

A managed, dedicated infrastructure for successful virtual event delivery, from a team that's big enough to deliver and small enough to care.

- ✓ **Isolated Workloads**
- ✓ **Ultimate Reliability**
- ✓ **Dedicated Resource Pool**
- ✓ **Guaranteed Availability**

Ultimate Flexibility

Enjoy LiveSwitch's P2P/SFU/MCU hybrid architecture and powerful API for media pipeline access across the widest range of platforms with a private cloud that gets the job done.

A-La-Carte Add-On Services

Available services provided by Frozen Mountain to augment your Private LiveSwitch Cloud that ensures the success of your event.
